

Instructions for Shipping Lithium Batteries

1 Drain each battery to 30% or less

Run each battery down on a camera or light until it reads 30% or lower.

2 Tape over every contact

Cover mount terminals, D-Tap, and USB ports with electrical or masking tape.

3 Wrap batteries individually & pack tight

Pack each battery separately with bubble wrap so no two batteries can touch. Use a sturdy corrugated box with 2 inches of padding on every side. Fill empty space so nothing shifts.

4 Attach the label below

Remove or cover any old shipping or hazard labels on a reused box.

5 Ship by ground service & share tracking

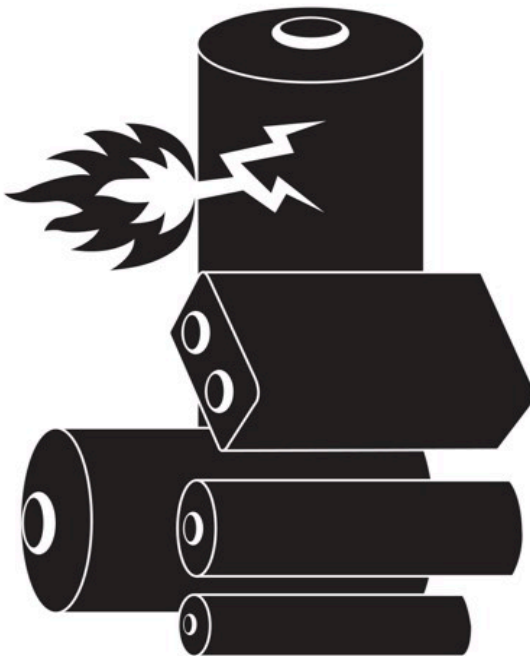

Ship via ground service using UPS, FedEx, or USPS. Reply to your order confirmation email with the tracking number.

SHIP TO

THT Battery
5716 Myrtle Ave #003
Ridgewood, NY 11385

Damaged batteries

Swollen, cracked, leaking or punctured batteries fall under stricter shipping rules. Contact us before sending one.

UN 3481
